

To the FCC,  
I am a proud listner of XM Radio. While weather and traffic are not available in the small state I live in, I feel that I have the right to hear whatever is available and offered by XM Radio. XM radio is a revolutionary 'product' and will forever change the way people feel about radio. I've had XM radio since December and I now have every product available. I listen to XM everywhere from my car to my office and would feel lost without it. Please do not try to limit the quality product XM offers.

Sincerely,

Lindsay Dunavant, ATC
